

1997-2003 Chevrolet Malibu Air Filter Replacement

Use this guide to install/clean an air filter for a 1997-2003 Chevrolet Malibu.

Written By: Sank Yang

INTRODUCTION

Replace or clean (if applicable) the air filter every 12,000 miles to keep your vehicle running smoothly.

TOOLS:

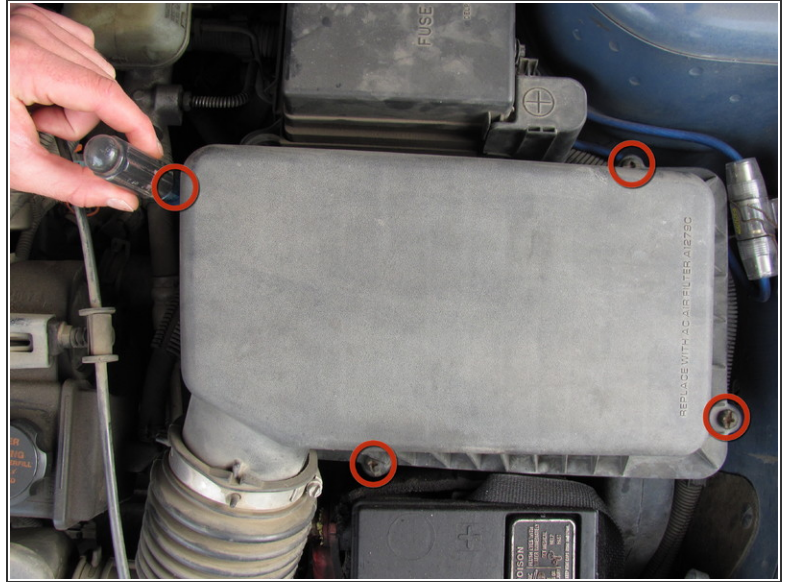

- [Phillips 3 Screwdriver](#) (1)

PARTS:

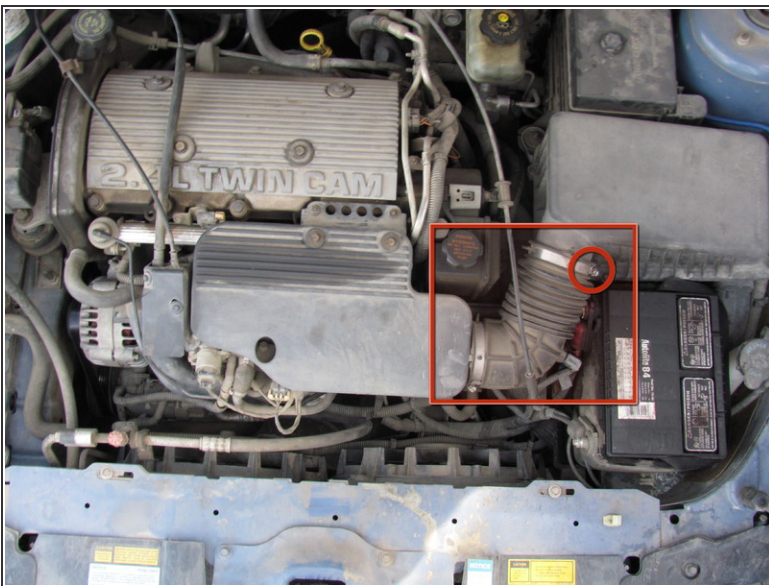

- [Air Filter](#) (1)

Step 1 — Air Filter

- The air filter housing is located on the driver side of the car.
- Loosen the four housing screws on the plastic air intake box.
- ⓘ Do not try to remove these screws from the intake box, as they are not designed to be removed.

Step 2

- Loosen the hose-clamp on the air intake tube located on the side of the air intake box.
- Remove the air intake tube from the intake box.

Step 3

- Gently lift the top off of the air intake box.

Step 4

- Remove the air filter from the housing and inspect it.
- If it can not be cleaned, then it should be replaced with a new one.

To reassemble your device, follow these instructions in reverse order.
